## Successful LLMIT pass!

Thursday 12<sup>th</sup> November 2009

Cornwallis Elt is delighted to announce that Garry Dobson, Senior Consultant within the Insurance team, has passed his Lloyd's and London Market Introductory Test.

Supported by the Chartered Insurance Institute (CII), LLMIT was jointly developed by Lloyd's and core market associations (International Underwriting Association - IUA, the London and International Insurance Brokers' Association - LIIBA and the Lloyd's Market Association - LMA). It provides an excellent foundation in Lloyd's and London Market practices and processes, reflecting recent regulatory changes and building on current work to introduce market reform in areas such as Market Reform Contract, Contract Certainty and the implementation of new accounting and settlement processes.

It sets out to promote and enhance standards of knowledge, performance and customer care across the entire London market by developing and testing awareness and comprehension of how business is traded in the market and the roles and responsibilities of those involved including brokers, underwriters, insurance companies and other bodies alike. It is the course of choice for the London market.

Sales and Finance Director Russell McIntyre commented; "This is an important success for Garry which really demonstrates his excellent knowledge of the Lloyds London market and underlines our commitment to ensuring that our Consultants are amongst the best in the market for understanding their clients' business sectors in-depth."
